Col. Robert M. Gottuso  
Commander, USAF Environmental  
Tech Applications Center  
Washington Navy Yard  
Washington, D. C. 20333

Dear Col. Gottuso:

Based on preliminary discussion between analysts of this Office and officers of ETAC, we believe that your organization may be able to help with a geographic research project we have under consideration. We wish to determine whether it is possible to predict, with any certainty, the continuation of current drought conditions -- especially in Africa and the Middle East -- over the next year or two. Our first concern would be to ascertain the feasibility and cost of such a study.

If you feel ETAC can be of assistance to us, I would appreciate your designation of an appropriate officer for [REDACTED] 25X1A  
our project officer, to contact. [REDACTED] can be reached at 25X1A  
351-2886 or code 143-2886.

25X1A

John Kerry King  
Director  
Basic and Geographic Intelligence
